

CONTINUOUS ALUMINUM

HINGES

RUGGED — "HEAVY DUTY" — DURABLE ONE PIECE CONSTRUCTION

Precision designed, these extruded aluminum hinges are adaptable to innumerable industrial applications. As a component part of such manufactured items as electrical appliances, cabinets, metal cases, luggage doors, aircraft fixtures and various other products, these heavy-duty hinges are incomparable in functional design and appearance.

NON-SEPARABLE HINGE ASSEMBLY

Under the continual strain of constant use the "roll-formed" type hinge eventually deforms, resulting in misalignment and possible replacement. Manufactured from extruded aluminum, TA's non-separable hinge will not deform. The continued smooth functioning of this hinge may be depended upon throughout its long life. Especially suited to any permanent hinge assembly requirement, this heavy-duty hinge will add strength and appearance to your product.

SEPARABLE HINGE ASSEMBLY

This type of hinge is considered an essential component for products designed to detach at the hinged area in order to facilitate access or usage of each section individually. In such cases it is essential to have a heavy-duty, non-binding separable hinge. The stress placed upon a separable hinge by constant use is even greater than that placed upon the non-separable type. TA's standard, heavy-duty extruded aluminum hinge will engage and disengage without binding at the nodes. The separable sections of your product may be easily, quickly and securely joined by this durable, light-weight attractive separable hinge assembly.

ALUMINUM HINGES

Heavy-duty—light-weight, both separable and non-separable hinges are made from 6061-T6 aluminum. Easily installed, they are adaptable to spot welding, riveting or the drilling of specific mounting holes. The standard stock length of both types is 71", however, they may be cut to any specified length to 14 1/2" on special order.

TAO1H02

HINGE - HALF (SEPARABLE & NON-SEPARABLE)

SAMPLE CALLOUT
BASIC PART NUMBER
LENGTH IN INCHES
FINISH CODE
TAO1H02-013-C=A HINGE-HALF, 6061-T4 ALUM., 13 INCHES LONG, CAUSTIC ETCH FINISH.
MATERIAL: 6061-T4 ALUMINUM
FINISH: C=CAUSTIC ETCH

TAO1H02

TAO1H03

HINGE - HALF (NON-SEPARABLE)

SAMPLE CALLOUT
BASIC PART NUMBER
LENGTH IN INCHES
FINISH CODE
TAO1H03-013-C=A HINGE-HALF, 6061-T4 ALUM., 13 INCHES LONG, CAUSTIC ETCH FINISH.
MATERIAL: 6061-T4 ALUMINUM
FINISH: C=CAUSTIC ETCH

TAO1H03

TAO1H04

HINGE - HALF (SEPARABLE)

SAMPLE CALLOUT
BASIC PART NUMBER
LENGTH IN INCHES
FINISH CODE
TAO1H04-013-C=A HINGE-HALF, 6061-T4 ALUM., 13 INCHES LONG, CAUSTIC ETCH FINISH.
MATERIAL: 6061-T4 ALUMINUM
FINISH: C=CAUSTIC ETCH

TAO1H04

TAO1H05

HINGE PIN

SAMPLE CALLOUT
BASIC PART NUMBER
LENGTH IN INCHES
TAO1H05-013=HINGE PIN, 302 STAINLESS STEEL, 13 INCHES LONG.
MATERIAL: 302 STAINLESS STEEL
